

Hello HOSA Advisors!

As you know, your members will be making (or have already) a big decision to become a registered organ and tissue donor at the BMV. Donate Life Ohio's goal is to simply equip your members with the knowledge needed to make a well-informed decision. All of us at Donate Life Ohio hope you were able to view our presentation at your fall conference. During that presentation, Gina introduced the **2020 HOSA Challenge!** We're proud to support HOSA and want to encourage students by removing the burden of fundraising to attend your next competition.

Our top 3 winning schools will earn the amounts below to be credited directly to Ohio HOSA for their use and every participant will receive a commemorative Donate Life & HOSA partners pin as well as other fun donation merchandise.

1st place - \$1,000

2nd place- \$500

3rd place- \$250

Attached you will find the flier which includes the deadline of 12/31/20 – it's coming up, fast! Download the "[Life Pass It On](#)" app wherever you find your apps to get your members started immediately and track your activities. We know many schools are remote so if you'd prefer to make a substitution suggestion to accommodate your students, just ask and we can add it to app for points. As always, each of us are here to support you each step of the way and can answer questions at any time.

In an attempt to continue to provide you with current resources, the following resources are always available to you:

- **A Free Educator Resource Kit:** The online resource kit provides a curriculum with sample lesson plans, a video with relatable personal stories of recipients and donor families and printable handouts. You can instantly download our materials here: <https://www.donatelifehio.org/you-can-help/teacher-resources/>.
- **Request a Pre-recorded Virtual Classroom Presentation:** Many schools have requested our virtual unit which brings the educators to your class. Through the slides, each of the educators explain different parts of donation and there are helpful extensions attached in each area. There's even a quiz at the end that your students can share their results to you. This is an entire unit that you can assign remotely or within your classroom. It's versatile and easy for students to navigate. *If you'd like this to be emailed to you, please reply to Jenny in this email w/ the number of students for our records.*
- **Resources available in your area:** Visit each organization's education page to learn about more specific opportunities such as virtual scheduling.
Lifeline of Ohio: <https://lifelineofohio.org/get-involved/school-outreach/>
Life Connection of Ohio: <https://lifeconnection.org/resources/>
Lifebanc: <https://www.lifebanc.org/resources/community-education/youth-programs/>

LifeCenter: <https://lifepassiton.org/community/teachers/>

We hope you find this opportunity & resources are helpful and we wish you luck in the HOSA Challenge! THANK YOU for all you do for your members!
